

Just when you think, corporations with power can't go to any lower level, a new low is announced. Sinclair Broadcasting with it's blatantly partisan Republican affiliations, attempting to force its stations to pre-empt prime time network programming to air anti-Kerry smear film, under the guise of a news program, sinks to an all time low. It is nothing but hijacking of the public airwaves to serve their own political agenda. It violates current FEC regulations as written because it is clearly a donation to George Bush. I'm quite sure their stations don't run on solar power. Prime time network programming has a subjective value. If Sinclair chooses to pre-empt that prime time programming, they are pre-empting that assigned value which makes it a biased paid event and not for the value the FCC intended the airwaves to be used. For the public good. Sinclair is violating all ethics of those standards and as such, should have their FCC license revoked. Please enter these comments into the public record of complaints.
